About Me

I'm really enthusiastic about getting involved in anything tech. Currently expanding my knowledge with personal and side projects involving both front and backend. I've worked professionally with APIs and really want to learn more in-depth coding. I was involved in testing and launching "Uber Local" in up to 50 locations throughout the UK. I am a conscientious, loyal team-player who works hard and is always willing to go the extra mile.

Professional Experience

ConfermaPay | Service Desk Analyst
July 2022 – August 2023

Key responsibilities:

- Provide 1st line support via telephone and email for the company's bespoke software

Autocab GPC (Uber) | Test & Implementations Specialist
January 2020 – July 2022

Key responsibilities:

- Created workflow and documents for old and new integrations. (JIRA, Confluence, Monday.com)
- Tested and Launched projects via API (Postman) working with clients such as UBER, Smartzi, Addison Lee, CMAC, Jyrney and FleetOnDemand.

Autocab GPC (Uber) | Devops Analyst
